BUSINESS MANAGEMENT PLATFORM OF THE YEAR
RIoT Secure AB

Headquartered in Stockholm but founded using a global team of seasoned experts across Germany, Australia and New Zealand, RIoT Secure AB is a pioneering force in Internet of Things (IoT) technology. In this rapidly evolving world, the company offers unparalleled protection for the broad range of IoT-connected devices used by businesses today. RIoT Secure's advanced security measures address the critical need for comprehensive IoT device protection, including from the devices' initial deployment and through its entire lifecycle, to ensure that businesses enjoy maximum benefit from their IoT technologies securely. RIoT Secure's advanced platform stands out amidst the IoT security landscape through its ability to simplify the complexities of device communication and security, enabling those who develop IoT applications to focus on being innovative in their functionality.

RIoT Secure's strategic approach has helped streamline the development of new technologies, whilst ensuring they are built upon dedicated security protocols that comprise industry-standard encryption and adhere to the latest cybersecurity legislation. The company's innovative methodology involves establishing a trusted foundation for IoT devices – a key factor to strengthening their integrity and identity from deployment and throughout their lifecycle. This secure footing creates a reliable and trustworthy environment where the entire IoT ecosystem can operate safely and flourish. RIoT Secure's innovative solutions comprise a hardware, firmware, and platforms which support a diverse range of microcontrollers and programming languages, and can be tailored to offer secure IoT device communication and management.

The judging panel was particularly impressed by the company's innovative lifecycle management platform. RIoT Secure's comprehensive platform provides secure, end-to-end management for IoT devices, each with their own dedicated microcontroller, enabling users to take control and maximise their use with ease. It is an all-encompassing solution that can be customised to the evolving nature of IoT ecosystems which need continuous maintenance and updates. IoT devices are undertaking more complex tasks than ever before, heightening the need for strong security protocols, and so RIoT Secure's comprehensive platform ensures they remain up to date through regular and seamless firmware updates.

> "
> RIoT Secure streamlines IoT innovation, offering developers a secure platform to focus on advancing AI and product development without the burdens of communication and security protocols.
